PROFESSIONAL PROJECT EXAMPLES

Credit Union Financial Services— API integration with 3rd party vendors for over 200 credit unions nationwide to help them process their customer's financial service requests like insurance and second mortgage applications

National Carpet Cleaning Rental Services— Developed features and resolved other issues discovered in the software used on over 200 blank kiosks across the country

PERSONAL PROJECT EXAMPLE

VINO— Single page React web app using the MERN stack and SCSS featuring user profile management and user authentication to search, store, comment and upload pictures of your favorite wines

EXPERIENCE

Full Stack Web Developer, Izoox, Longmont, CO — Aug 2021 - Dec 2022

- Building web applications with CRUD operations using RESTful APIs, with third party API integration
- Performing live end-to-end testing with third party vendors to troubleshoot and test API integrations, ensuring integrity of the application
- Web hook development and implementation providing a dynamic customer interface impacting all employees for over 200 credit unions
- Utilizing version control and managing deployment processes in Gitlab for new feature releases with CI/CD methodology
- UX/UI design development for new features on customer-facing platforms
- Relational database design leveraging Laravel Eloquent

Software Development Student, General Assembly, Denver, CO — 2020-2021

- Development of web applications utilizing CRUD operations and RESTful APIs while leveraging the MERN stack
- Development and integration of backend systems utilizing relational and non-relational databases
- Development and integration of backend APIs as well as implementing third-party APIs into web applications
- Create, update and interpret diagrams for visualizing system architecture utilizing MVC concepts

Digital Marketing Strategist, Guest Floor, Denver, CO — 2016-2018

- Manage and update websites with new feature development in WordPress, including SEO, for all four owned brands
- Develop and execute social media strategy for Facebook, Twitter, and Instagram, and present reports to stakeholders
- Increase subscribers by 300% in new email marketing campaign strategy
